

The Square One is a 2-way, stand mounted loudspeaker and is the entry point into Wilson Benesch High-End loudspeakers.

Trickle-down technologies from the Odyssey Range guarantee outstanding dynamic capabilities and like all Wilson Benesch loudspeakers, an exceptional signal to noise ratio to bring you closer to the musical event.

The latest incarnation of the Square One sees important developments over its predecessor. The most notable of these is the addition of bass ports on the underside of the enclosure, carefully developed in conjunction with a higher mass driver cone to enhance bass performance and extension.

To cope with the increased energy, the Series 2 Square One internal construction has been modified. Controlling cabinet noise requires damping, with this in mind, viscoelastically bonded critical mass damping has been employed, to absorb energy from the cabinet wall and dissipate it silently.

In common with the Series 1 Square range, the effective Wilson Benesch Assisted Bass Radiator remains at the rear of the cabinet to absorb and control the energy generated by the powerful Tactic drive unit.

“ These speakers are amazing! They deliver superb music. Perceived quality is matched by the intrinsic quality and the care that has been taken in the design and manufacture of components, making the product highly desirable - Patrice Philippe - Haute Fidelite

Aesthetically, the Series 2 Square range sees additional high class wood veneer options offered, residing beneath a new, low profile grill, laser cut from two sheets of steel and finished with turned metal links, offering the lowest diffraction of any loudspeaker grill.

Unhindered dynamics and coherent time alignment come as standard, thanks to the absence of crossover components on the Tactic Drive Unit and a simple 1st-order Tweeter crossover.

And so it follows, that you can be confident that each and every subtle detail will be enthusiastically conveyed by the Wilson Benesch Square One.

**Drivers:**

1 x 25mm (1") Soft Dome Wilson Benesch Spec Tweeter  
1 x 170mm (7") Wilson Benesch Tactic Drive Unit

**Low Frequency Loading:** Assisted Bass Radiator / Bass Ports

**Sensitivity:** 87dB

**Impedance:** 6 Ohms Nominal / 4 Ohms Minimal

**Frequency Response:** 45Hz - 24KHz

**Crossover Frequency:** 5KHz

**Dimensions:**

**Height:** 325mm (12.8")

**Width:** 200mm (8")

**Depth:** 285mm (11.2")

**Volume:** 10 Litres

**Weight:** 10 kg / 22kg with stand 22 lbs / 48 lbs

**Finishes Available:**

**Gloss Wood Finishes:** Piano Black, White, Red Tulip, Red Birds Eye, Birds Eye Maple, Burr Walnut, Ebonised Walnut, Walnut, Zebrano

**Satin Wood Finishes:** Natural Cherry, Maple, Oak

The Centre Square is a low profile, 2.5-way centre speaker capable of presenting every subtle detail of dialogue, sound effect or music with ease.

The centre channel in any multi-channel cinema setup is a critical component typically handling around 70% of the program material. With this in mind, the Centre Square has been designed exhibit the lowest possible level of noise whilst delivering a huge amount of energy from its discrete enclosure.

To achieve this objective critical mass damping pads have been deployed internally to break up standing waves and defeat the onset of panel resonance. The bottom of the cabinet forms an intrinsic part of the design, where two Wilson Benesch Assisted Bass Radiators are located to silently deal with the internal energy produced by the twin Tactic drive units.

Unhindered dynamics and coherent time alignment come as standard, thanks to the absence of crossover components on the Tactic mid Drive Unit and simple 1st-order Tweeter and bass unit crossovers. Twin Tactic driver units, as seen in the Odyssey Center, allow the Centre Square to dynamically reproduce, with authority and realism, any cinematic event or sound effect.

Aesthetically, the Series 2 Square range sees additional high class wood veneer options offered, residing beneath a new low profile grill, laser cut from two sheets of steel and finished with turned metal links, offering the lowest diffraction of any loudspeaker grill.

Built by the same technicians as the multi award winning Odyssey Range and employing the same driver technologies, the Square Centre will integrate seamlessly with any Square Range or Odyssey Range multi-channel setup to bring you the ultimate cinematic experience.

**Drivers:**

1 x 25mm (1") Soft dome Wilson Benesch spec Tweeter

1 x 170mm (7") Wilson Benesch Tactic Bass Drive Unit

1 x 170mm (7") Wilson Benesch Tactic Mid Drive Unit

**Low Freq. Loading:** Double Chamber Assisted Bass Radiator

**Sensitivity:** 87dB

**Impedance:** 6 Ohms Nominal / 4 Ohms Minimal

**Frequency Response:** 45Hz - 24KHz

**Crossover Frequency:** 5KHz / 500Hz

**Dimensions:**

**Height:** 210mm (8.2")

**Width:** 790mm (31.1")

**Depth:** 200mm (7.9")

**Volume:** 14 Litres

**Weight:** 18 kg / 30kg with stand 40 lbs / 66 lbs

**Finishes Available:**

**Gloss Wood Finishes:** Piano Black, White, Red Tulip, Red Birds Eye, Birds Eye Maple, Burr Walnut, Ebonised Walnut, Walnut, Zebrano

**Satin Wood Finishes:** Natural Cherry, Maple, Oak
